## Environmental Policy

### Regional Container Lines Public Company Limited

#### 1. Purpose

Regional Container Lines Public Company Limited and its group of companies (the “Company”) The Company is committed to conducting its business in line with sustainable development principles, with strong environmental responsibility. It recognizes the importance of preventing and minimizing environmental impacts arising from business operations. Accordingly, the Company has established policies aligned with internationally recognized standards and practices, including compliance with the requirements of the International Maritime Organization (IMO), adherence to global sustainability principles under the United Nations Global Compact (UNGC), and support of the United Nations Sustainable Development Goals (SDGs). These policies and guidelines are implemented as follows:

#### 2. Scope of Applicability

This Environmental Policy applies to all employees of Regional Container Lines Public Company Limited and employees of its group of companies (the “Company”).

#### 3. Policy Statement

##### 1. Climate Change Management

The Company recognizes the environmental impacts arising from its business operations and the importance of managing climate change in line with the United Nations Sustainable Development Goal SDG 13: Climate Action, to address climate change challenges. The Company has set a target to achieve net-zero greenhouse gas emissions by 2050 (B.E. 2593), in accordance with the requirements of the International Maritime Organization (IMO). These commitments serve as guiding principles for the Company’s compliance with international standards in conducting its business.

##### 2. Energy Management

The Company places strong emphasis on efficient and sustainable energy management by promoting prudent and energy-saving practices. Employees are encouraged to raise awareness of energy conservation and efficient energy use, including controlling energy consumption such as using

electricity only when necessary and switching off electrical equipment when not in use. These practices aim to enhance the overall efficiency of business

3. Water Resource Management

The Company recognizes the importance of efficient and sustainable water resource management. It promotes the responsible use of water among all employees to maximize benefits and minimize water loss resulting from unnecessary or inefficient usage.

4. Waste and Waste Management

The Company promotes proper waste management and waste segregation practices, while setting targets to reduce general waste. It fosters awareness of waste reduction at source, proper segregation prior to disposal, and appropriate waste management based on waste types. The Company also supports the reuse and recycling of waste to maximize value through various initiatives, such as projects promoting recyclable waste separation for use in the production of recycled products.

5. Promotion of Alternative and Renewable Energy Use

The Company encourages the development of new innovations and continuous improvement of operational processes, including the adoption of technological systems to support the management of alternative and renewable energy. These efforts demonstrate the Company’s environmental responsibility and contribute to long-term organizational sustainability. By developing new approaches, the Company aims to enhance operational efficiency while remaining environmentally friendly.

Accordingly, all members of the Board of Directors, executives, employees, and staff of the Company are required to understand and have a duty to support, promote, and comply with this Sustainability Policy, in order to ensure the Company’s business operations and organizational development are carried out in a sustainable manner.
